

Summer Math Fun

Math Fact Fluency

Students should practice Math Facts **DAILY** to develop fluency. Flashcards, oral drills, computer games, and written practice drills are great ways to practice and get ready for next school year! Fluency is essential so students can free up their brain power to do higher level math problems!

The more your child knows about these facts, the better mathematician they will become!

Listed below are math flashcards you can print for your child to practice!
